Expensive colour
print cartridges
and paper

Linking Observations
to EYFS
assessments

Inadequate parent
engagement

Manual Planning
and Progress Track-
ing Reports

eyLog Transforms The Process Of Recording Observations And Managing A Child's Learning Journey

eyLog eliminates paper-based observation sheets, post-it notes and manual linking of observations to EYFS assessments, thereby significantly reducing the effort and operational expenses. The smart and secure eyLog tablet devices enable media-rich observations with images, videos and audio clips. The automated and intelligent trackers/charts support detailed analysis of a child's progress. Finally, eyLog truly facilitates 'parents as partners in learning' enabling 360° engagement through instant online access of their child's learning journey and daily diary, while allowing comments and contributions from home.

eyLog is the most comprehensive solution and enables practitioners to focus more on providing the best early years education to children - an ultimate aim of both nurseries and parents!

Integrated EYFS Assessments

eyLog is compliant with the new 2012 EYFS framework and will enable you to create a comprehensive EYFS profile of the children in your nursery, associate observations with relevant learning goals through a single click and plan the next steps for the child to achieve the key learning aspects across all the EYFS learning areas.

Rich Multimedia - Images, Videos and Audio clips

A picture says a thousand words; A video, a million. Move away from the restrictions of a paper based learning journey by incorporating rich media (photos, videos and audios!). eyLog allows you to add multiple media to a single observation.

Online Learning Journey - Anytime, Anywhere

Observations saved on the tablet are immediately available and visible to all relevant practitioners and parents. The learning journey can be accessed with both the web and the tablet interfaces and observations can be filtered by date, observation type, featured text, or EYFS Assessments.

Built-in Review Process to Ensure Quality

Observations can be saved as Drafts and completed at a later point in time. Senior staff, such as room leaders, can be earmarked as "reviewers" of observations so that observations are reviewed before they are published to the learning journey. Drafts ensure that no single moment is lost and also helps to maintain the quality of the observations and the learning journey.

Instant Paperless Communication with Parents

The Daily Summary Sheet, Accident Sheet and All About Me form can be easily created and shared with parents, thereby reducing paperwork and saving time.

The integrated email messaging feature facilitates instant communication between the nursery and parents and eliminates the need for any add-on applications to send messages. You can share newsletters and send other notifications to parents using eyLog.

360° Engagement with Parents

eyLog enables parents to understand their child's development on a more regular and real-time basis. You can share a child's learning journey with parents, increasing their involvement in the activities at the nursery. Parents can be notified automatically by e-mail as soon as a new observation is published to their child's learning journey.

eyLog also makes it possible for parents to contribute their observations at home, making the learning journey even more comprehensive and enabling a 360 degree view of the child's development in its early years. Nursery staff can review parent observations, link them to EYFS assessments, add their own comments and publish these to the child's learning journey.

End-to-end Security

eyLog uses the Secure Sockets Layer (SSL) to encrypt all communication between the server and the tablets. We store all data on secure Cloud-based Servers in data centres located here in UK. All data is regularly backed-up onto redundant systems.

Both the tablet and the web interface support Role-based access with clearly defined access rights. Each nursery staff get a personal PIN number to access the tablets ensuring the traceability of observations to specific individuals.

eyLog offers fully locked-down secure tablet devices to ensure they are not misused in any manner - Facebook, e-mails, etc., are all disabled on these specially configured high-security tablets.

Export to PDF and HTML Download

The entire learning journey or entries within a specific date range can be exported as a PDF. This permits offline report submission to authorities if required. The child's online learning journey can be ordered in the same rich HTML format on a disc/ USB for parents to keep as a lifelong memory when the child moves on to another nursery or school.

ECaT, CoEL, Leuven Scales, Montessori

eyLog supports Every Child a Talker (ECaT), Characteristics of Effective Learning (CoEL), Leuven Scales of Emotional Well-being and Involvement, and the Montessori framework thereby enabling you to focus and plan towards a well-rounded learning & development of the children.

Intelligent Automated Trackers and Charts

eyLog enables you to track and analyse the progress of a child's early years development with automated trackers and interactive charts highlighting achieved milestones, assessed EYFS assessments and planning next steps. eyLog also includes End-of-Term, Progress Check at Age Two, and other reports that allows staff to monitor the observation recording process and brings their attention to overdue tasks.

Offline Capability to Record Observations Outdoors in Garden/Park

eyLog allows you to record moments and complete observations from anywhere, even without internet connectivity such as outdoor visits to the garden /forest/park. Once you return to the nursery or as soon as a WiFi connection is available, the tablet will automatically save all data to eyLog servers.

Extensive Customisation for your Nursery/Group

The web interface can be customised to include the logo of the nursery. Parent's logging-in to the system clearly see the nursery logo and can relate eyLog as an offering from their trusted nursery. The names of the observation fields (such as "Observation", "Analysis", etc., can all be customised as per your current practices.

What Nurseries And Parents Say

"We are rolling-out eyLog to all the other 8 nurseries in our group. Our nursery managers and staff are excited about the new eyLog system for creating online learning journeys and share them more quickly and easily with parents. The automatic trackers help us keep a check on a child's progress."

- Kerry Flinn, Facilities & Resources Manager, Acorn Childcare

"On-boarding was simple and quick, and the support from eyLog team has been very prompt. eyLog has reduced laborious paperwork and post-it notes, and more importantly increased parent engagement. It is definitely recommended!"

- Helen Hobbs, Managing Director, Wellies Day Nurseries

"A highly effective system for observing and assessing children's progress, enables practitioners to see at a glance where there are gaps in children's development as well as identifying those children who are making exceptional progress. Parents are able to feed into this system by viewing observations of their children and inputting comments about events and progress that occurs at home."

- Ofsted Report 2014, Anglia Sunshine Nurseries

"Practitioners earlier had to spend time out from children to write up the observations and we no longer need to buy expensive printer cartridges, paper and separate cameras. I will save at least £3000 this year alone!"

- Jacqui Stoneman, Owner, Anglia Sunshine Nurseries

"Loved looking back at what my son has been doing and can't wait to see what he'll be getting up to. The videos are such a nice way of actually seeing what he does and how he interacts at nursery. This system is a fantastic addition to the already brilliant facility you have there!"

- Carys Underwood, Parent using eyLog

"I logged into eyLog and it is brilliant. I've just watched my child in a running race from yesterday and it was so good to see. This is going to be a great advantage."

- Claudia Sharpe, Parent using eyLog

Go Paperless and Reduce Costs

- 80% Cost Savings
- Management Dashboard & Review
- Offline Capability
- End-to-End Security
- Extensive Customisation

Transform the Process of Recording Observations

- Rich Evidence - Images, Videos & Audios
- Integrated One-Click Assessments
- Next Steps & Planning Sheet
- Automated Progress Trackers & Charts
- Individual & Group Summative Reports

360° Engagement of Parents as Partners

- Online Learning Journey
- Comments & Observations from Home
- Registry & Daily Communication Diary
- All About Me & Accident Sheets
- Messaging to Parents
